

## **Benenden's Own Science Challenge**

In March, to coincide with British Science Week, a national ten-day celebration of the STEM subjects, we ran our own Science-based challenge involving the Fourths and Upper Fourth.

Fourths were part of a Guinness World Record competition and were given the task of producing a poster which detailed a journey related to their learning in any of the STEM subjects (Science, Technologies, Engineering and Mathematics) or their thoughts about developing new technologies, or their aspirations for a career in a STEM subject in the future.

Upper Fourths were part of the first annual STEMenden Challenge and were asked to design and produce a research-type document, video, A3 or A4 design sheet or PowerPoint file on a 're-imagined' product using the latest scientific discovery or thinking.
